INTRODUCTION

Nowadays, the role of schools, communities, and educational institutions is very important in the field of education. The most responsible and grateful task of raising a child has been adopted by parents. A child is the greatest trust of a traumatized person to his parents, and the heart of a child is the greatest trust of a traumatized person to his parents. The biggest heritage is the esplanade of education. Abdurauf Fitrat: "Happiness of every nation depends on its prosperity, of course, and the discipline of the people's peace. If peace is good, then the nation relies on the discipline of families. "Wherever there is a strong discipline in the traffic, the state and the nation will be strong."

A person with a family, close friendship, politeness, responsibility, understanding of respect, and harmony of love and affection will find a society. The family suddenly became a member of the society and became a family. The great politics of humanity, not one nation, is called shanaraq, the chain of humanity. The analysis of scientific-pedagogical, psychological, physiological, and philosophical works shows the number of studies, because children are the most important educational environment, and in this environment, the character and worldview are formed.

In shaping the morale of any nation, the influence of the unquestionable shanaraq has been unequaled. The reason is that the freshest feelings of a person, the first concepts of marriage are formed in the first time.[3]

Children's upbringing is determined by the way their parents interact with them, the child's parents say harsh words, and the stick has a

negative effect on their mental and physical development. If you care for your child's needs and raise them with care and kindness, you will also educate your children in the future. Our Prophet once said, "A single father cannot give his offspring a better inheritance than kindness."

Family relationships between fathers and mothers or persons who are responsible for the perfection of children (old women, fathers and mothers) and relationships between children in various situations are described. Family relationships ensure the mental and spiritual perfection of the children and bring out the self-confidence in the parents. The enthusiasm, business, and worldview of the businessmen will expand.

It is considered a grateful and responsible duty of parents to raise their children. Today, as a result of the neglect of some parents in the upbringing of their children, their parents have lost their reputation as ideal human beings. The reason for this is that they do not give proper education, they are busy with small exercises, and they make big mistakes in educating their children.

In the upbringing of children, effective educational efforts should always be taken, the spiritual attitude of the parents should be strong, the children should be respected, the children should be respected, the children should be respected, and a strict regime should be established. In this case, it is important to know what kind of person you will be in the future, and what kind of profession you will be.

Parents, through their attitudes towards each other, their respect for each other, and their

behavior, carry out educational processes, and each parent needs deep understanding of their duties and responsibilities. For example, if a parent talks at the table or makes silly faces, the child wants to do a little work in the garden, and if the parent is busy with useful things, the parent will not have time to stop blowing his nose, let his organs rest on the table, wash and be clean. It would be a good idea if you could do it.

If the eternal and good idea of "family is holy" is devalued and our national abilities are weak for a thousand years, then such a painful situation should be overcome as a great struggle. The reason is that our elders, many wise elders, and our experienced luminaries, if they decide, the whole community can work together to solve any problem. It is a place of educational abilities and programs in the spirit of the mahalla. There is a wise proverb in our nation: "The mahalla is the same as the father, the same as the mother." Mahalla educational center. The residents of the mahalla are responsible for the moral education of every boy and girl in the area. The reason for this is the saying "A child jets off to the motherland". If we give an example of behavior, one of the shanarak chiefs in the mahalla will always serve in the festivals of his neighbors, he will not spare anyone who comes to help him, he is kind, kind, and tries to keep his little knowledge to the fullest, he is also kind to his shanarak members. etc. We call such a person a wonderful person and act accordingly. If it is the other way around, we will act against him, because of his behavior, the whole city will be forced. However, Putin's society does not suffer from his actions. It had an impact on me.

On January 19, 2021, the President of the Republic of Uzbekistan Shavkat Mirziyoyev spoke about spiritual and enlightening works in the collection entitled "If the body of society is economy, then its soul is spirituality." It is true to say that our children are raised by the mobile phone in their hand, not by their parents, parents, school, neighborhood, or institute. Today, the phone is not a mobile communication but a tool for spreading ideas, but the ideas that infect our psyche enter our cities and society every minute, not hour. Excessive use of the phone in turn affects various diseases, memory loss, loss of vision, and health. In the end,

parents should be careful not to let their child get used to the phone, as it will cause the child not to listen. If parents are using social media and watching TV shows, watching series on Instagram, the child will not have a phone. It is a well-known fact that health and well-being play an important role in child rearing. Any person with a perfect mind knows that if there is life in the world, it is good to be alive. If there is money, there is a priceless wealth called percent. As long as there is a percentage, human beings always have good intentions and hopes. "We have set a great goal to achieve the Renaissance period in our country, so we need to create all the necessary conditions to educate Khorezmi, Beruni, Ibn Sina, Ulugbek, Navoi and Babur. In this regard, it is necessary to promote education and upbringing, to make healthy lifestyle decisions, and to promote science and innovation. With this goal in mind, we will carry out large-scale reforms based on the idea that "New Uzbekistan will start from the school level, from the education system".[1]

At the end of the day, it was emphasized that in the future, you should be physically healthy, physically healthy, mentally healthy, free-thinking, patriotic, and knowledgeable about the great national human values and worldly sciences. For example, from birth to 30 years of age, every training should be done to strengthen the child.

In preparing the young generation for life, the methods, customs, abilities, and education that have been left behind for many generations, our ancestors have been giving advice, explanations, praise, flattery, encouragement, prohibition, and coercion in education.
